Relevant Experience

Corpo de Bombeiros Militar - CBMERJ

Out 2008 - 2022 // Rio de Janeiro, RJ

- As a member of the Fire Department, I worked in several search and rescue operations.
- In 2009, he completed the Mountain Search and Rescue course, and, in this role, the objective was to save people lost in forests in Brazil and around the world.
- In 2011, he completed the Airport Firefighter Technical Training Course - FTBA. In this course I acquired several skills in the most diverse forms of rescue in small and large aircraft.

Aeroporto Internacional do Rio de Janeiro - Galeão

Out 2012 - 2014 // Rio de Janeiro, RJ

- Upon completing the FTBA course, I received an invitation to work at the International Airport of Rio de Janeiro, where I worked for 2 years as a specialist in Aircraft Rescue.

Professional Goal

Energetic and dedicated Computer Science and Cyber Security enthusiast with a strong academic foundation and a portfolio of hands-on projects showcasing proficiency in both disciplines. Seeking an entry-level opportunity to leverage my theoretical knowledge, practical skills, and passion for technology in a professional setting. As a motivated learner with a track record of successful project execution, I am eager to contribute to a dynamic team while further expanding my practical experience and expertise in Computer Science and Cyber Security domains.

Courses & Certifications

Programming School Danki Code // Brazil, RJ

- Complete Front End Course (HTML5/CSS3/JavaScript/Tailwind CSS/Typescript/Bootstrap/Angular)
- Complete Back End Course (PHP/NodeJs/VueJs/Laravel)
- Complete Wordpress Course
- Complete JavaScript Course
- Complete Web Design Course
- Complete English Course for Programmers and Digital Marketing
- Facebook Ads and Google Ads Course

Programming School B7Web // Brazil, RJ

- PHP and JavaScript Complete Course
- Complete Course of HTML5 & Css, Git and GitHub
- Laravel, TypeScript, NodeJs, ReactJs, Angular 9, VueJs, NextJs course
- Bootstrap, Sass, Firebase, Docker, MySql and MongoDB course
- Complete Front-End, Flutter, AndroidJs, React Native and Wordpress course

CYBERSECURITY

- Complete Linux course
- Complete Ethical Hacker Course

Skills

Programming Languages

PHP, JavaScript (ES6), TypeScript, HTML, CSS, Flutter

Libraries & Frameworks

jQuery, React, Bootstrap, VueJs, Node.js, Express, NextJs, Laravel

Tools & Platforms

Git, GitHub, Webpack, Craft, Wordpress, Docker, Firebase, MySql

Design

Photoshop, Illustrator

Education

Saint Leo University

2023 - 2027 // Tampa, FL, EUA

Bachelor in CyberSecurity

Faculdade Descomplica

2022 - Atual // Rio de Janeiro, RJ, BR

Bachelor in Computer Science

Projects

CMS - Management System

I present a website management panel developed through the synergy between PHP and JavaScript, offering an efficient and intuitive system to manage websites dynamically. Combining the robustness of PHP in data processing and interactions with an agile and responsive front-end in JavaScript, the panel allows administrators to control content, users and functionalities in an agile way. The optimized user interface, combined with security practices and well-structured architecture, demonstrate my ability to create sophisticated technological solutions that increase the efficiency and usability of web environments.

Languages

- Portuguese - Native
- English - Intermediary
