Relevant Experince

Corpo de Bombeiros Militar - CBMERJ
Out 2008 - 2022 // Rio de Janeiro, RJ

‣ As a member of the Fire Department, I worked in several search and rescue operations.

‣ In 2009, he completed the Mountain Search and Rescue course, and, in this role, the objective was to save people lost in forests in Brazil and around the world.

‣ In 2011, he completed the Airport Firefighter Technical Training Course - FTBA. In this course I acquired several skills in the most diverse forms of rescue in small and large aircraft.

Aeroporto Internacional do Rio de Janeiro - Galeão
Out 2012 - 2014 // Rio de Janeiro, RJ

‣ Upon completing the FTBA course, I received an invitation to work at the International Airport of Rio de Janeiro, where I worked for 2 years as a specialist in Aircraft Rescue.

Professional Goal

My professional goal is to obtain a position as a Fullstack Jr Developer, where I can apply the skills and knowledge acquired in my specialization courses. Despite having no previous professional experience in this area, I am committed to learning quickly and dedicating myself to being a valuable contributor to the team. I aim to work with experienced colleagues and learn from them while developing my skills and competencies. I'm excited about the prospect of using my knowledge and passion to be a Fullstack Developer and help achieve the goals of the team and the organization as a whole.

Universidade Estácio de Sá
2013 - 2016 // Rio de Janeiro, RJ

Bachelor of Systems Analysis and Development

Faculdade Descomplica
2022 - Atual // Rio de Janeiro, RJ

Studying Computer Science

Projects

CMS – Sistema de Gestão
The CSM project is an application developed using the PHP and JavaScript languages. The project aims to provide a complete solution for managing software development teams, including project tracking, task management, time tracking, and communication between team members. The project is based on a modular software architecture, allowing the easy extension of functionalities and adaptation to the specific needs of each team. Additionally, the CSM project is highly configurable and customizable, allowing each team to configure its task management options and priorities.

Languages

‣ Portuguese - Native
‣ English - Intermediary
